---

Software engineering student with a passion for designing and building innovative software solutions. Experienced in backend, full-stack, and AI/ML projects, with hands-on expertise in SwiftUI, Flask, Spring Boot, and OpenAI/Google APIs.

## SKILLS

---

**Programming Languages:** Java, C, C++, Python, Swift, HTML/CSS, JavaScript

**Frameworks and Libraries:** Spring, Spring Boot, Flask, React, Typescript, Node.js, Streamlit, Android (Java), iOS (Swift)

**Database & Cloud:** PostgreSQL, MySQL, NoSQL, Supabase, Firebase, Cloud Infrastructure

**Development & DevOps:** Git, Docker, Bash, Vim, GCC, CI/CD | Linux (Debian/Ubuntu), GitHub Projects (Kanban)

**Core Competencies:** Agile Software Development, Object-Oriented Design, SDLC, Design Patterns, UML, Data Structures and Algorithms, Debugging

## EDUCATION

---

**Concordia University, Montreal** | Full-time Student

Expected Graduation: May. 2027

*Bachelor of Engineering in Software Engineering*

**NMIMS University, Mumbai**

2022-2024

*Bachelor of Technology in Computer Engineering*

**Relevant Coursework:** Software Architecture and Design, Operating Systems, Database Systems, Computer Networks

## EXPERIENCE

---

**Reliance Jio Ltd. - Software Engineering Intern (Signal Processing/AI)**

May. 2024 – Jul. 2024

- Engineered a custom audio diarization algorithm in Python using **MFCC extraction and sliding window buffers accelerated with CUDA** to segment and identify speakers, improving real-time reliability for large-scale conferencing applications
- Integrated OpenAI Whisper for segment-wise captioning and transcription, enabling 98% accuracy and fault-tolerant speech-to-text processing
- Developed a human voice detection module using WebRTC VAD with duration/amplitude-based filtering, reducing false positives by **40%** and improving detection accuracy

## PROJECTS

---

**ShareCycle – Software Developer**

- Developed bike-sharing backend enabling rentals, real-time availability tracking, and station rebalancing with a scalable architecture, incorporating secure authentication, encryption
- Developed backend **REST API** using **Java/Spring Boot**, implementing core business logic
- Built **MySQL** persistence layer via **Docker Compose**, ensuring reproducible setup and data integrity
- Enhanced automated test suite by writing **unit and integration tests (JUnit)** for service and controller layers, to ensure production-quality code and support React frontend integration

**Mudic – AI-Powered Wellness App I (iOS + Flask + Google Gemini)** [<https://github.com/das-bhaskar/Mudic>]

- Developed **iOS frontend in SwiftUI** with dynamic pastel theming and **mood-based real-time UI updates**
- Built **Flask backend with REST APIs** and lightweight data persistence; tunneled securely via Ngrok for mobile integration
- Integrated **Google Gemini API** for NLP-driven mood analysis, personalized messages, haikus, and interactive vent/joke responses

## LEADERSHIP

---

**Harvard WorldMUN 2024 – Delegate, Team India I Taipei, Taiwan**

- Represented Team India in the **Disarmament and International Security Committee (DISEC)**, focusing on **Quantum Computing and International Security**
